Summer School *Brighter Days* Program

**School's out for the Summer, but we are not resting.
We are rolling out our *Brighter Days Program* to our Corporate
Clients interested in making a social and fiscal impact.**

Leading Edge Designs believes in giving back and our travels have led us to working with some "cash-strapped" school districts in Los Angeles and San Diego.

Our goal is to significantly reduce the purchase price of LED lighting upgrades for our participating school districts so they will realize significant energy and maintenance cost savings. These savings will have a notable affect on the school's operating budget year after year enabling them to refocus these dollars to the classroom, or other programs that will most help the children.

To accomplish this, Leading Edge Designs is setting aside **5% of every LED purchase** from our Clients to be applied to the cost of LED lighting for the schools. This program is running from June 15 - August 15th

Lighting projects may include:

School stadiums, Sports fields and courts, Parking Lots,
Administration buildings, Classrooms, Theaters, and other
indoor and outdoor lighting.
